FROM FARM TO FORK

IN TERMS OF OUR FOOD EVERYTHING IS PREPARED FRESHLY IN TONY'S AND WE PLACE GREAT EMPHASIS ON THIS.

We buy all of our fresh ingredients. The chips are the best example of the natural preparation process. The potatoes arrive on premises straight from the field. There are not additives or preservatives.

They are freshly peeled and chipped every single day and then cooked as ordered and served to the customer. Tony's unlike most fast foods still use this traditional process. Another difference in the food preparation process that separates Tony's from other local fast food shops is that all our foods is made to order for each customer. This means that every customer receives food freshly cooked just for them. We believe that consumers are tired of receiving foods that have been sitting at heated display counters.

At Tony's foods are always freshly prepared to the highest food safety standard!

Thanks for your continuous support!
