IN TERMS OF OUR FOOD EVERYTHING IS PREPARED FRESHLY IN TONY'S AND WE PLACE GREAT EMPHASIS ON THIS.

All of our ingredients are sourced fresh. Our chips are the best example of this. The potatoes have no any additives or preservatives and arrive at Tony's straight from the field. They are freshly peeled and chipped every single day, then cooked as per order to each customer. Unlike most fast food premises Tony's still use this traditional process. Our food is always freshly prepared to the highest food safety standard.

We at Tony's believe consumers are tired of receiving food that has been sitting under heated display counters and it is this that separates Tony's from other local fast food shops.

It's as simple as: You order, we freshly cook, You eat.
